## IR Controlled 10-channel High Power Relay Module

IR-310-RM

Dimensions

The IR-310-RM is a 10-channel high power relay module designed for the power control of various appliances. The relay module can switch up to 10A loads. There are NO/NC switches and protection circuit for each channel. The relays can be controlled independently or sequentially by serial communication with Modbus RTU protocol, as well as by wireless IR remote control. There are also maximum 5 interlocked relay pairs for interlocked switching. The application field can be manual/automatic power switch, light scenario control and energy conservation etc.

Features

- 10 channels high power relays: 5A x 6, 10A x 4
- Supports IR remote control (custom:64 cmds, built-in: 32 cmds) for relay control
- NO & NC terminals for each channel
- Protection circuit for each channel
- Sequential relay control
- Supports maximum 5 interlocked relay pairs
- Power-on values and power failure memory
- Supports RS-232 / RS-485 serial interface
- Supports Modbus/RTU protocol (Slave)
- Modbus Network IDs: 1 ~ 15 (HW); 1 ~ 247 (SW)

Application

- e-Classroom service
- Lighting Scenario Control
- Home and Building Automation

Utility Features

IR utility (including IR-310-RM utility) is the configuration tool for IR-310-RM.

- Can get/set separate or all settings from/to IR-310-RM.
- For relay output test and relay states indication.
- Control IR-310-RM to emit IR commands for an IR learning remote.
